

EazyCut

# EAZYCUT PREMIUM TRIMMING SOLUTIONS

**EazyCut trimming machines** offer a smart solution for pruning and harvesting a wide variety of flowers, plants, and herbs – in short, an endless range of crops. The clean trimming result, combined with savings on labor costs, makes EazyCut machines highly attractive. On top of that, EazyCut machines come in various models, are always lightweight, easy to operate, and low maintenance.

# EazyCut

## TRIMMING SYSTEMS

### EAZYCUT 400 | COMPACT TRIMMER

This lightweight trimmer is equipped with a powerful 2-stroke engine. The trimmings are blown directly into the collection bag by the integrated fan. Easy for one person to operate. With long handles and ergonomic "ergolift," trimming close to the ground is effortless.

### EAZYCUT 600 | BACKPACK OR TRAY TRIMMER

This versatile modular trimming system can be installed on a fixed frame, on a Danish trolley, or worn with a backpack. It's supplied as a DIY kit and can be powered in various ways.

The backpack version offers excellent mobility and can be powered by a 4-stroke petrol or battery motor.

In a fixed setup or on a trolley, we recommend using an electric motor (230V) with a frequency regulator. Optionally, we can provide a conveyor belt at an attractive price.

- **Powerful motor: 2-stroke, battery, or 230V**
- **Integrated fan for 100% collection**
- **Ideal for trimming, pruning, and harvesting many crops**
- **Neat cutting results—great for propagation**
- **Hardened, self-sharpening blades (lifespan up to 10 years!)**
- **Compact, lightweight, and low maintenance**
- **High labor savings and fast return on investment**

## **EAZY CUT 1201F & 1601F | FRAME MODELS**

These latest large EazyCut models are powerful, with improved housing and enhanced user safety. The two standard frame models offer a durable solution built to last. The 1201F and 1601F are ideal for integration into your own production line or can be paired with one of the EazyFrames, with customization available.

## **EAZY CUT CE | HANDHELD TRIMMERS**

The EazyCut CE model is available in two widths: 1201 and 1601. These lightweight models are carried by two people. With dual safety controls on both side handles and an emergency stop, users can work safely. The EazyCut 1201CE and 1601CE offer maximum flexibility and can be used anywhere.

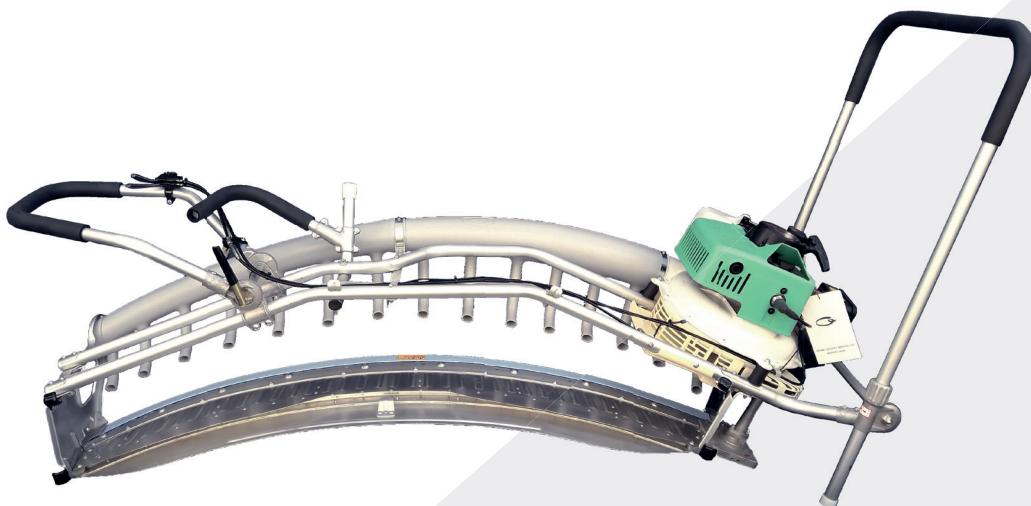

## 6 EAZYCUT CURVED | TEA & LAVENDER HARVESTER

This curved model allows the blade to follow the plant shape, resulting in a beautiful trim. The EazyCurve features a strong curvature with a 1150 mm radius.

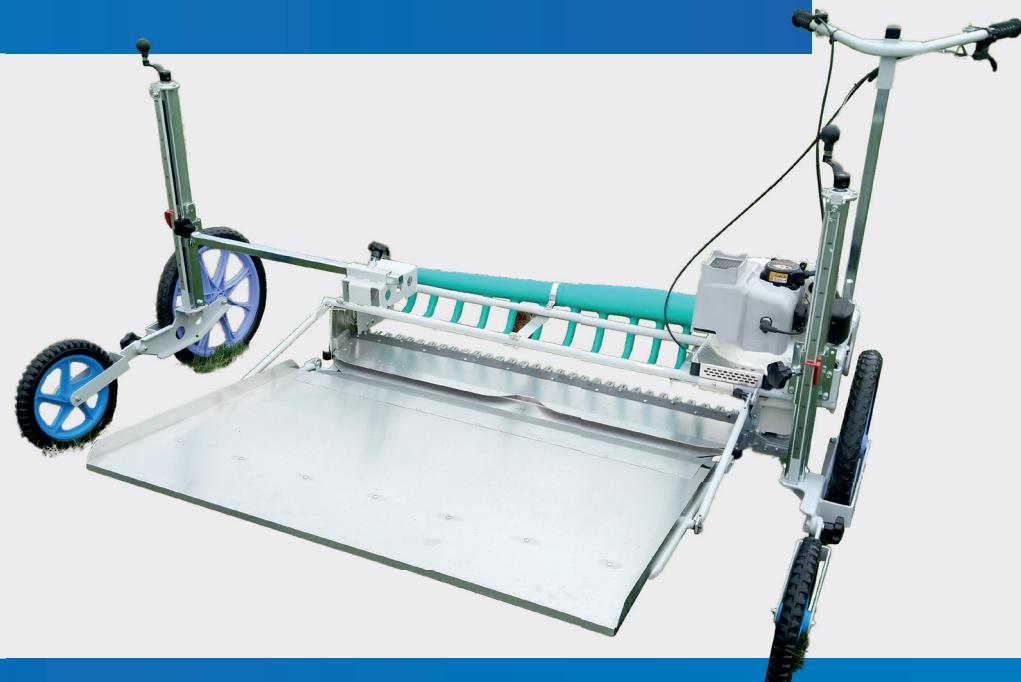

### EAZYCURVE FRAME

A special frame has been developed for the curved EazyCurve trimmer, making harvesting even easier and lighter. The trimmer is mounted at the front of the frame, and plant guides push the crop together for optimal trimming. Naturally, the cutting height can be adjusted, and cuttings are blown into the collection bag.

## 6 EAZYCUT VPS 1210-B | TRIMMER WITH READY-TO-USE FRAME

This wheeled trimmer is ideal for pruning various types of beds in greenhouses and fields. The cutting height (10 to 50 cm) can be easily adjusted via spindles on both sides. The track width is also adjustable (145 to 195 cm). A support plate prevents the collection bag from dragging over the crop. The lightweight frame allows for easy maneuvering—can be operated by a single person walking backward.

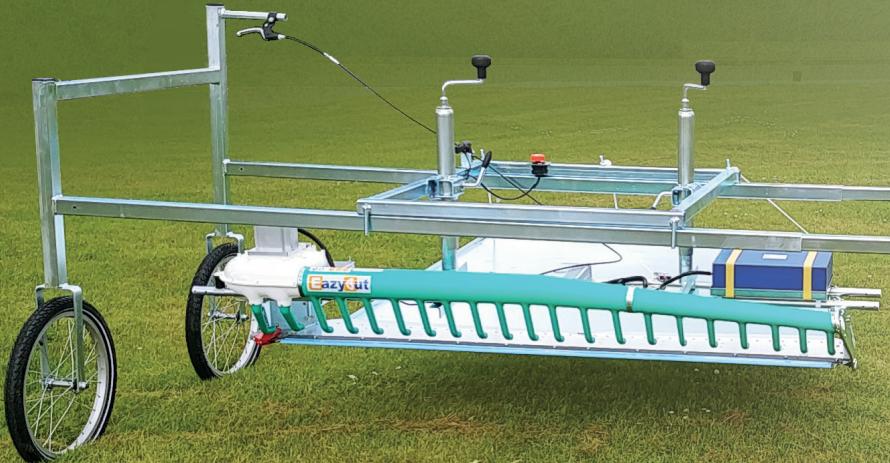

# EazyCut FRAME SOLUTIONS

## STANDARD EAZYFRAMES | SIMPLE & EFFICIENT

The mobile EazyFrames are lightweight and easy to adjust in height and width. The cutting height can be precisely set using spindles, resulting in a clean, uniform trim.

- Includes collection bag and support plate
- Galvanized frame with height adjustment
- Powerful 2-stroke engine or electric drive (battery or 230V).
- Suitable for EazyCut I201F and I601F

With an EazyFrame, we create a robust harvesting machine on wheels, operable by one or two people. Growers can choose from various options, including swivel wheels (90°/360°), large wheels, a rotation unit to rotate the trimmer within the frame, and extra-wide or tall constructions.

## EAZYTABLE

A special mobile frame has been developed for cultivation tables, suitable for EazyCut I201F and I601F. This table frame is easy to operate by two people and moves smoothly over greenhouse tables. Growers using this solution can trim up to 20 tables per hour—resulting in significant cost savings.

## FIXED INSTALLATION FRAMES

We also offer custom fixed frames for the smaller EC-600 and for the I201F and I601F models. These can be designed so that cultivation tables and/or conveyor belts move smoothly underneath.

# EAZYCUT ELECTRIC & EAZYBATTERY

## ENVIRONMENTALLY FRIENDLY & SUSTAINABLE

Choosing the EazyCut Electric helps reduce harmful air pollution. EazyCut Electric produces no exhaust emissions. If you charge the EazyBattery using renewable energy, you can reduce your greenhouse gas emissions even further.

- Compatible with all EazyCut 1201, 1601, VPS 1210-B, and EazyCurve models
- Quiet and eco-friendly operation
- Easy battery change and fast charging

The EazyCut Electric with EazyBattery has a low center of gravity and balanced weight distribution, making it easy to handle. Due to its additional 6 kg of weight, we recommend using one of the EazyFrames for greater efficiency and ease of use.

The EazyBattery system operates at two speeds. The electric motor can also be powered by a 230V connection. In this setup, a fixed-frame EazyFrame can be considered so that cultivation tables or conveyor belts can move underneath.

SPECIFICATIES	Width	Depth	Height	Motor	Weight	Width	Height	Depth
EazyCut 400	400 mm			Mitsubishi 2-T	5,7 kg			
EazyCut 600	560 mm	< 6 mm		Honda 4-T	6,0 kg (basic) 7,8 kg (back-pack)			
EazyCut 600E				Electric 110 V / 230 V	14,5 kg			
EazyCut 1201CE	1200 mm				26,0 kg			
EazyCut 1601CE	1600 mm				28,1 kg			
EazyCut 1200 Curved	1200 mm				14,7 kg			1150 mm
EazyCut 1201F	1200 mm				18 kg			
EazyCut 1601F	1600 mm				20,1 kg			
EazyCut VPS 1210B	1200 mm	< 8 mm		Zenoah 2-T	45 kg	1450 - 1950 mm	100 - 550 mm	
EazyFrame 1201	1200 mm			Optional*:	48 kg	1400 - 2100 mm	50 - 500 mm	
EazyFrame 1601	1600 mm			Battery 48V	51 kg	1800 - 3000 mm	50-500 mm	
EazyTable 1201	1200 mm			230V	23 kg	1400 - 1700 mm	0-400 mm	
EazyTable 1601	1600 mm				26 kg	1600 - 2000 mm	0-400 mm
